

If job applicants lie to get a job, they'll probably lie to keep it. Find out upfront.

Reduce risk. Save time. Spend less.

Quickly Hire Best Applicants

Law enforcement agencies and fire departments are tasked with safeguarding citizens and communities. That task starts by effectively pre-screening job applicants and periodically evaluating current personnel – without bias – for positions such as police/fire officers, sheriffs, dispatchers, jailers, etc.

If your agency uses a screening tool such as a Law Enforcement Pre-Employment Test (LEPET), EyeDetect helps automate and greatly streamline that part of the hiring process. EyeDetect tests can be customized to meet specific agency needs. Find the truth about past drug use, criminal behavior (whether caught or not), accuracy when reporting past discipline, or any other critical issue of concern.

Best of all, EyeDetect never gets tired or influenced. It's 100% unbiased and will never discriminate based on gender, race or color.

Conduct Efficient Investigations

Law enforcement agencies are tasked with investigating and solving crimes. With EyeDetect, investigations can get faster closure by conducting reliable lie detection tests on suspects.

What is EyeDetect?

Deception causes slight involuntary changes in eye behavior due to an increase in cognitive load. EyeDetect uses a high-speed camera to measure these changes and an advanced algorithm analyzes the data to render a credibility score with 86-88% accuracy.

EyeDetect Makes Finding Honest Personnel Easier

- Accurate Screening** – Quickly eliminate deceptive candidates.
- Unbiased** – Tests are automated and unbiased.
- Quick Test** – Tests take just 15 to 30 minutes.
- Fast Results** – Test results are ready in less than 5 minutes.
- Nonintrusive** – No uncomfortable cables or sensors are used.
- Fast Training** – Train test administrators in about 4 hours.
- Efficient** – Administer up to 36 tests a day with one examiner.
- Portable** – Equipment is portable and easily moved.

How EyeDetect Works

1. Participant takes a 15- to 30-minute true/false or yes/no test.
2. Data are captured, encrypted and uploaded to a secure web server.
3. Proprietary algorithms provide a credible or deceptive score in less than 5 minutes.

EyeDetect Station Includes:

- Laptop, stand, and mouse
- High-definition eye-tracking camera
- Library of customizable tests for law enforcement, fire, corrections
- Technical support by phone and email (business hours)
- Option for subscription or per-use scoring licenses
- Free software updates

"EyeDetect, used in conjunction with polygraph, has been a huge benefit for our agency."

– Captain Matt Sly, Idaho State Police

"EyeDetect... it's been spectacular so far. This system has proven itself to me."

Norman K. "Brad" Bradley III
Fire Chief, Northwest Fire District
